Re: CRD 2006 TRAVEL SURVEY Community Response and
MUSTEL GROUP Prize Draw Winners

*High survey response shows that CRD residents care about
the planning of future transportation*

CRD Survey Response and Thank You

Thank you to all CRD residents who participated in the recent regional Travel Survey. We received a high level of response from all CRD areas and from all types of households across the region. Return rates averaged 64%. The results will be extremely useful to your CRD and municipal planners in designing better transportation networks for your communities in the years ahead.

Once again, thank you to everyone for taking the time to participate in this important survey and contributing in this way to the future of your community!

Prize Draw Winners
